data

/ˈdeɪtə/

Filter definitions by topic

All Computing Philosophy

noun

facts and statistics collected together for reference or analysis.
"there is very little data available"

Similar: facts figures statistics details particulars specifics features

- the quantities, characters, or symbols on which operations are performed by a computer, which may be stored and transmitted in the form of electrical signals, magnetic signals, or optical, or mechanical recording media.

PHILOSOPHY

Data

Data are units of information, often numeric, that are collected through observation. In a more technical sense, data are a set of values of qualitative or quantitative variables about one or more persons or objects, while a datum is a single value of a single variable. Wikipedia
