Abstract	This study assessed employee engagement, engagement drivers and its impact on intention to quit. The theory of reasoned action and a theoretical framework for examining employee engagement, engagement drivers i.e. Compensation & Benefits, Job Characteristics, Perceived Organization Support, Perceived Manager/ Supervisor Support, Learning & Development, Employee Communication and Person-Organization Fit on Intention to quit were used as the theoretical underpinnings for the study. Data are examined by Multivariate Analysis of Variance and Structural Equation Model using SPSS and AMOS. Findings confirmed that employee engagement, engagement drivers having a significant relationship with the employees' intention to quit. Findings also confirmed Compensation & Benefits, Job Characteristics, Perceived Organization Support, Perceived Manager/ Supervisor Support, Learning & Development, Employee Communication and Person-Organization Fit are better predictor of both employee engagement and intention to quit.
